Requested	Privilege Description	Initial Criteria	Maintenance/Renewal Criteria
<input type="checkbox"/>	<p>CORE PRIVILEGES</p> <p>In collaboration with supervising physicians in the Division of Endocrinology and through implementation of standardized procedures, the Clinical Nurse Specialist (CNS) provides expert and complex nursing care to a caseload of patients and their families, including diagnostic evaluation, monitoring of treatment plans, and patient and family education. The CNS also collaborates with the medical staff and affiliated healthcare providers to coordinate the delivery of quality care to all patients in the clinic. This job description is approved by the appropriate medical and nursing administrators, the Interdisciplinary Practice Committee (IDPC), and the Stanford Hospital and Clinics (SHC) Medical Executive Committee and Board of Directors.</p> <p>Triages patients as appropriate. Provides consultation and expertise within scope of practice in an effort to promote quality patient care. Provides follow-up assessments via individual treatment modalities. These functions are outlined by the approval of a Standardized Procedure for Assessment and Management of Patients in the CNS job description</p> <p>SUPERVISION: General</p>	<p>Current active CA RN license</p> <p>Clinical Nurse Specialist Certification from the California Board of Registered Nursing (BRN)</p> <p>Masters degree in Nursing</p> <p>Minimum of 3 years clinical experience working with patients with diabetes</p>	300 Procedures per year
	ADVANCED PROCEDURES (above criteria must also be met)	INITIAL CRITERIA	RENEWAL CRITERIA
<input type="checkbox"/>	<p>NONE</p> <p>SUPERVISION:</p>	None	None

I. Supervision

SUPERVISION: The exercise of these privileges requires a designated collaborating/supervising physician with clinical privileges at SHC. The CNS is accountable clinically to the Clinic Manager of Medical Specialties. Medical Supervision is provided by the Clinical Assistant Professor for the Diabetes service, clinic chief of Endocrine Clinic. The supervising/collaborating physician must provide supervision as designated in the privileges per the following definitions;

General Supervision = physician is available either by phone or other electronic means of communication

Direct Supervision = physician is on premises

Personal Supervision = physician in the exam room or procedure area

(A physician cannot supervise more than four CNS's at one time)

II. Consultation

Clinical Nurse Specialists will work under the supervision of the Supervising Physician in the service. In addition to general consultation, immediate physician consultation will be obtained under the following circumstances from Attending Supervising Physician or his/her designee:

- a. With emergent conditions requiring prompt medical attention;
- b. With acute decompensation of the patient situation;
- c. When there is a problem that is not resolving as anticipated with unexplained, historical, physical and/or laboratory findings;
- d. When there is a new medical problem, change in prescription or significant change in medical management;
- e. Upon request of the patient, Allied Health Professional, or physician.

Follow-up, Documentation and Communication:

Performed in accordance with the Standardized Procedure for Assessment and Management of Patients (see Appendix A) and/or with the consulting physician's recommendation.

I attest that I have met all of the required criteria and will meet all competency requirements for each procedure that I have requested and I will follow the protocol for the advance procedures requested.
